

Método 1: colab-cli (Herramienta nativa en Rust)

Instalación

```
curl -fsSL https://raw.githubusercontent.com/keys-i/colab-cli/main/install.sh | sh
```

Si el comando colab-cli no se encuentra, agrega ~/.cargo/bin al PATH:

```
echo 'export PATH="$HOME/.cargo/bin:$PATH"' >> ~/.bashrc  
source ~/.bashrc
```

Verifica la instalación:

```
colab-cli --version
```
